Abrasive Belts, Industrial Adhesive Tapes and Glues

For many years, we have represented the world-wide known company 3M (Minnesota Mining and Manufacturing Company). In our factory in Berlin, we hold a large selection of 3M products in stock, ready for immediate distribution to our customers.

3M Abrasive belts are top class. The precision 3M Trizact has a uniquely structured pyramid surface. The structured abrasives are a real opportunity to dramatically reduce the finishing process: Fewer stages, shorter sequences, and less operations.

We can deliver Scotch-Brite articles, for grinding, deburring and producing satin finishes on all types of metals.

You can often replace the old fashioned mechanical operations of welding, screwing, riveting, and clamping items by the use of 3M Industrial tapes and adhesives. If you want to know more about how this can be achieved, we can provide the advice.
